

apimeal::IRequest

```
classDiagram
    class IRequest
    class IHttpRequest
    class IHttpResponse
    IRequest <|-- IHttpRequest
    IRequest <|-- IHttpResponse
```

The diagram illustrates a class hierarchy. At the top is the 'apimeal::IRequest' class. Below it are two subclasses: 'apimeal::IHttpRequest' on the left and 'apimeal::IHttpResponse' on the right. A horizontal line connects the two subclasses, with an upward-pointing arrow from the center of this line to the 'apimeal::IRequest' class, indicating that both subclasses inherit from the base class.

apimeal::IHttpRequest

apimeal::IHttpResponse
